

DECODELABS INDUSTRIAL TRAINING PROGRAM 2026

FULL STACK PROJECT 1 RESPONSIVE FREELANCE PORTFOLIO

SUBMITTED BY LAIBA ZAHID

1. PROJECT OVERVIEW

Project Information

Item	Details
Project Name	Full Stack Project 1 – Freelance Portfolio
Domain	Web Development / Frontend
Platform	Responsive Web Application

Project Description

This project is a responsive portfolio website designed for freelance full-stack developers. The website showcases professional skills, completed projects, achievements, and provides a contact form for potential clients.

Project Objectives

The project demonstrates proficiency in:

- Mobile-First Design
- Semantic HTML5
- CSS Grid Layout
- CSS Flexbox
- JavaScript State Management
- WCAG Accessibility Standards

Target Audience

The portfolio is intended for freelance developers seeking to establish a professional online presence and attract clients.

Key Features

- Fully Responsive Design

- Animated Statistics Counter
- Contact Form Validation
- Mobile Hamburger Navigation
- Smooth Scrolling Navigation
- WCAG-Compliant Accessibility

2. REQUIREMENTS CHECKLIST

#	Requirement	Status	Evidence
1	Mobile-First Design	Completed	Base CSS without media queries
2	Semantic HTML5	Completed	Semantic tags implemented
3	CSS Grid Layout	Completed	work-grid and stats-grid
4	CSS Flexbox	Completed	navbar and tech-stack
5	Tablet Breakpoint (768px)	Completed	Two-column layout
6	Desktop Breakpoint (1024px)	Completed	Three-column layout
7	Mocha Mousse Color	Completed	Applied throughout design
8	Ethereal Blue Color	Completed	Hover states and links
9	Moonlit Grey Color	Completed	Background sections
10	Inter Font	Completed	Imported from Google Fonts
11	Roboto Font	Completed	Imported from Google Fonts
12	JavaScript State Management	Completed	Counter animation
13	WCAG Accessibility	Completed	ARIA labels and semantics
14	Responsive Typography	Completed	clamp() implementation

Completion Summary

Metric	Value
Total Requirements	14
Completed	14
Completion Percentage	100%

3. TECHNOLOGY STACK

Frontend Technologies

Technology	Purpose
HTML5	Semantic structure and accessibility
CSS3	Layout, styling and responsiveness
JavaScript (Vanilla)	Interactivity and dynamic functionality

HTML5 Features

- Semantic Elements
- Accessibility Support
- Responsive Meta Tags

CSS3 Features

- CSS Grid
- Flexbox
- Media Queries
- CSS Variables
- Responsive Typography

JavaScript Features

- Intersection Observer API
- DOM Manipulation
- Event Handling
- Form Validation
- Smooth Scrolling

Tools & Services

Tool	Purpose
Google Fonts	Typography
Font Awesome 6	Icons
GitHub	Version Control
VS Code	Development Environment

4. DESIGN & COLOR PALETTE

Design Philosophy

The design follows a modern 2025 aesthetic focused on warmth, usability, and professional presentation.

Color Palette

Color	Hex Code	Usage
Mocha Mousse	#A87C6B	Buttons, Logo, Highlights
Ethereal Blue	#6B9BBF	Links, Hover Effects, Badges
Moonlit Grey	#F2F0EA	Backgrounds, Cards, Tags

Typography

Element	Font Family	Weight
Headings	Inter	600
Body Text	Roboto	400–500

Responsive Breakpoints

Device	Width
Mobile	Default
Tablet	768px and above
Desktop	1024px and above

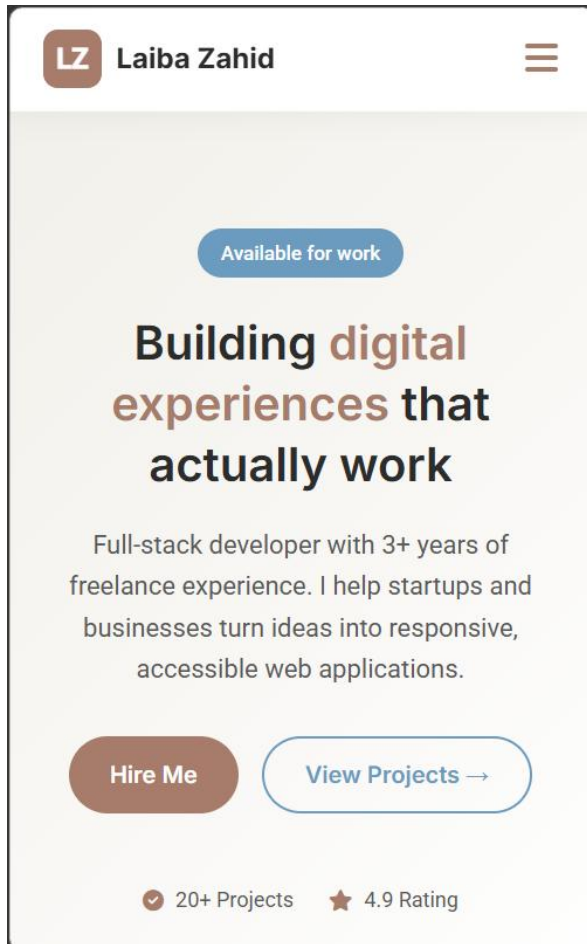

5. FILE STRUCTURE

DecodeLabs-Project-1/

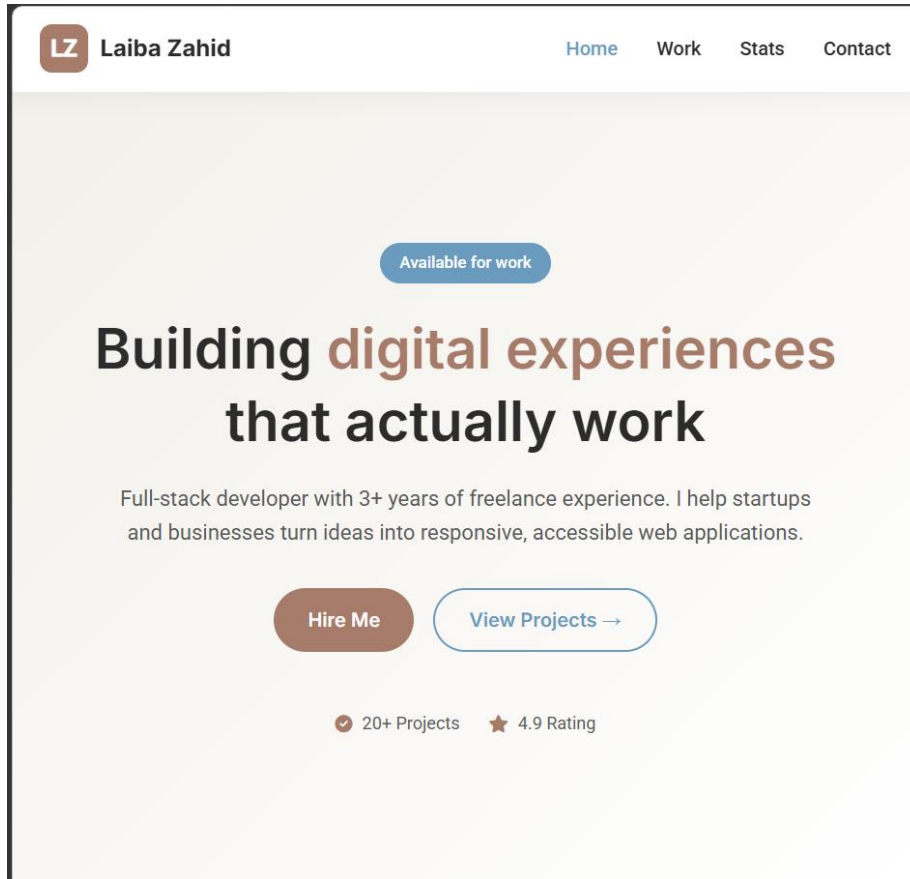

```

6. SCREENSHOTS

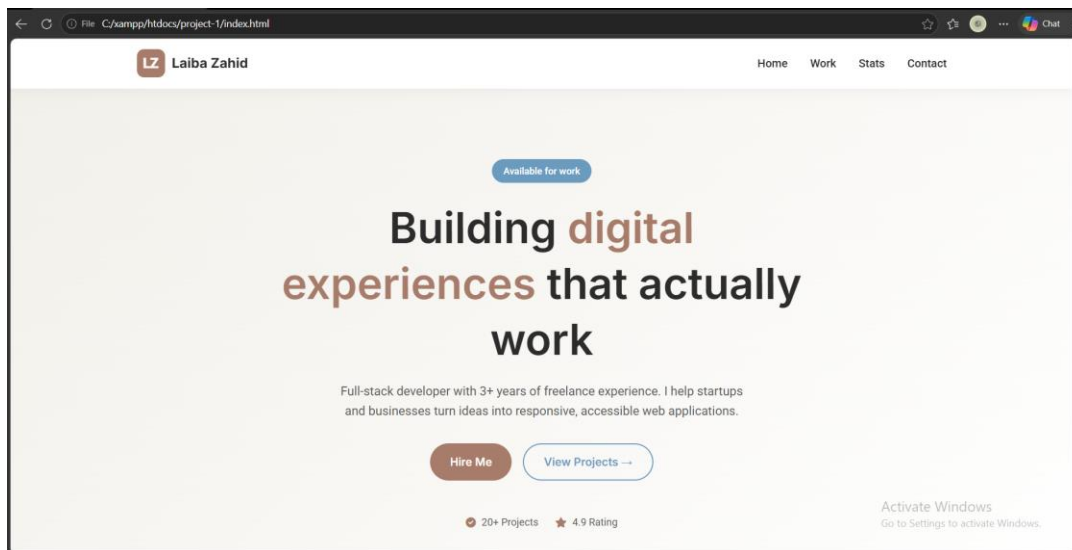

Screenshot 1 – Mobile View

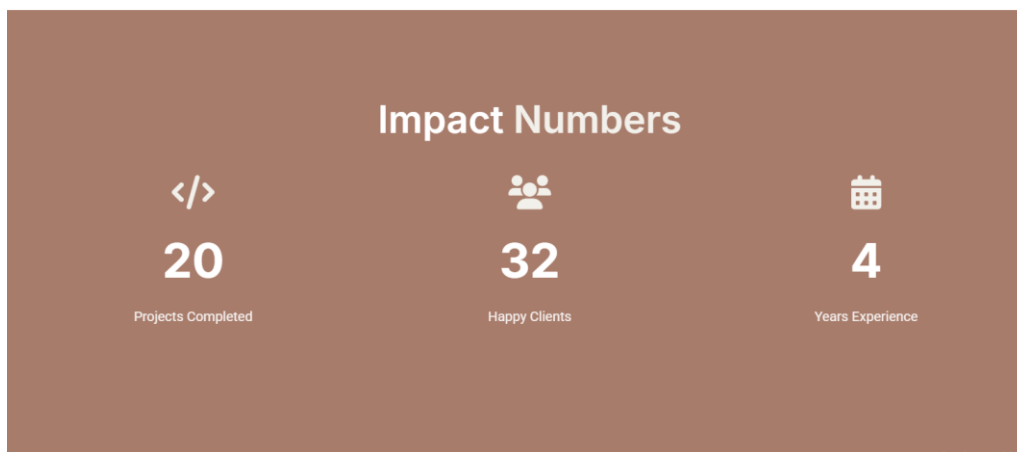

Screenshot 2 – Tablet View

Screenshot 3 – Desktop View

Screenshot 4 – Counter Animation

7. KEY CODE SNIPPETS

CSS Grid Layout

```
.work-grid {
  display: grid;
  grid-template-columns: 1fr;
  gap: 30px;
}
```

CSS Flexbox Layout

```
.navbar {
  display: flex;
  justify-content: space-between;
  align-items: center;
}
```

JavaScript Counter Animation

```
const observer = new IntersectionObserver((entries) => {
  entries.forEach(entry => {
    if (entry.isIntersecting) {
      animateNumbers();
    }
  });
});
```

Mobile-First Media Queries

```
@media (min-width: 768px) { }

@media (min-width: 1024px) { }
```

8. CHALLENGES & SOLUTIONS

Challenge	Problem	Solution	Time Taken
Mobile Menu Toggle	Menu not opening	Added JS event listener and active class	20 min
Counter Animation	Animation not triggering	Implemented Intersection Observer	45 min
CSS Grid Responsiveness	Columns not adjusting correctly	Optimized media queries	30 min
Form Validation	Empty forms submitted	Added JavaScript validation	25 min

9. TESTING REPORT

Browser Testing

Browser	Mobile	Tablet	Desktop
Chrome 126	Pass	Pass	Pass
Firefox 127	Pass	Pass	Pass
Safari 17	Pass	Pass	Pass
Edge 126	Pass	Pass	Pass

Device Testing

Device	Resolution	Status
iPhone SE	375×667	Pass
iPhone 12 Pro	390×844	Pass
iPad Mini	768×1024	Pass
iPad Pro	1024×1366	Pass
Desktop 1080p	1920×1080	Pass

Feature Testing

All major features successfully passed testing, including navigation, scrolling, animations, validation, and accessibility.

10. CONCLUSION & LEARNINGS

Key Learnings

1. Mobile-First Development
2. CSS Grid vs Flexbox Usage
3. Semantic HTML Best Practices
4. JavaScript State Management
5. Accessibility and WCAG Standards

Project Statistics

Metric	Value
Development Time	6 Hours
HTML Lines	180
CSS Lines	200
JavaScript Lines	120
Total Lines	500

Future Improvements

- Dark Mode
- Node.js Backend Integration
- Real-Time Chat
- Blog Section
- SEO Optimization
- Progressive Web App (PWA)

11. GITHUB REPOSITORY

Repository Information

Repository Link:

Repository Contents

- Complete Source Code
- README Documentation
- Screenshots

- Commit History

12. DECLARATION

I hereby declare that this project, **“Full Stack Project 1 – Responsive Freelance Portfolio,”** is my original work. All requirements specified in the DecodeLabs project brief have been successfully fulfilled.

The project was developed using:

- HTML5
- CSS3
- Vanilla JavaScript

No frameworks such as Bootstrap, Tailwind CSS, React, or Vue were used.

All code follows industry-standard coding practices and internship guidelines.

Student Information

Field	Details
